

## Rearranging Questions

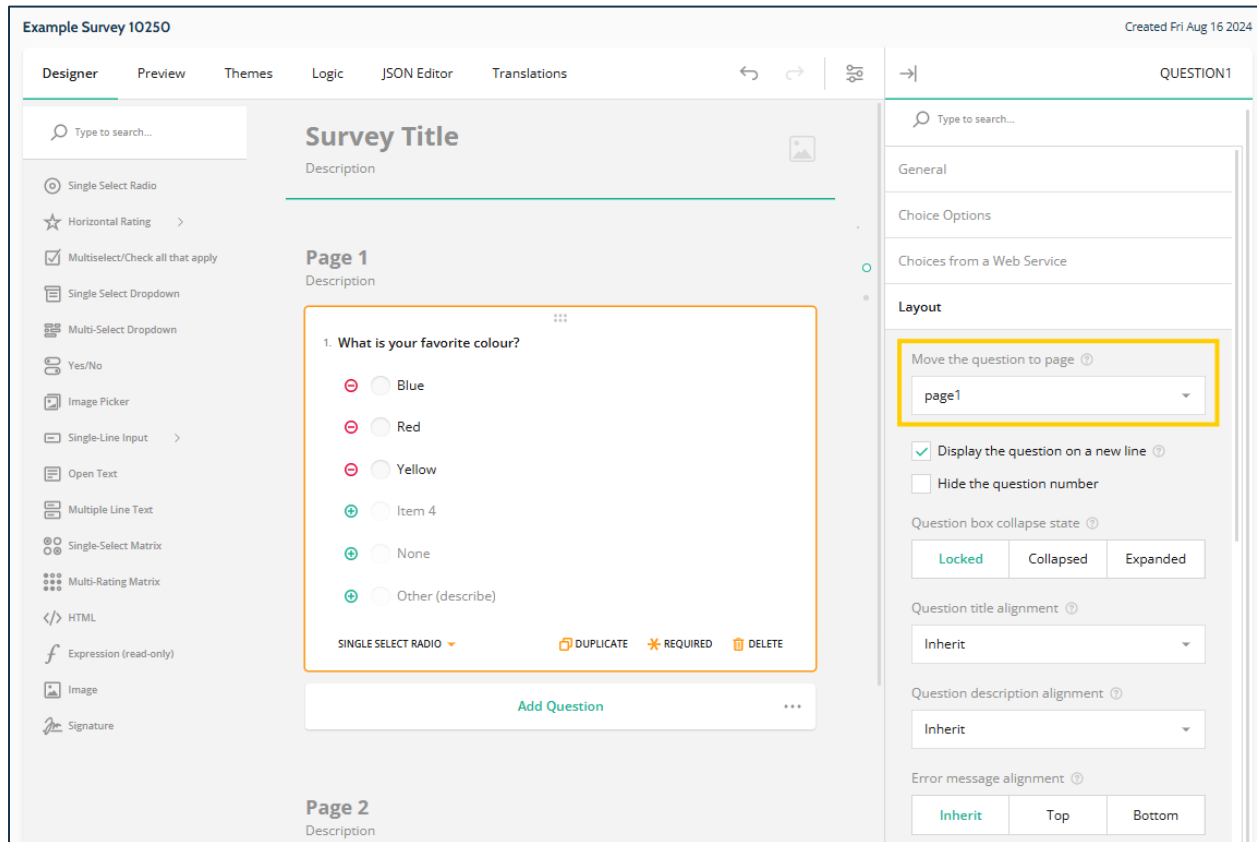

You can rearrange questions by using the drag-and-drop feature as you please before your survey goes live. Just click on the 6 dots at the top-center of the question area and drag the question where you want it to appear in the survey.

The screenshot shows the 'Designer' view of a survey titled 'Example Survey 10250'. The interface includes a top navigation bar with tabs for 'Designer', 'Preview', 'Themes', 'Logic', 'JSON Editor', and 'Translations'. A search bar is located at the top left of the main workspace. The main workspace is divided into 'Page 1' and 'Page 2'. In 'Page 1', a question titled '1. What is your favorite colour?' is displayed with radio button options: Blue, Red, Yellow, Item 4, None, and Other (describe). A yellow box highlights a six-dot menu icon at the top center of the question area. Below the question are buttons for 'SINGLE SELECT RADIO', 'DUPLICATE', 'REQUIRED', and 'DELETE', along with an 'Add Question' button. The right-hand panel shows the 'QUESTION1' configuration, including 'General' settings and a 'Choice Options' section with a table of choices.

Value	Text		
1	Blue		
2	Red		
3	Yellow		

If your survey happens to be a long survey, you can relocate a question by accessing the “Layout” panel in the sidebar on the right-hand side of the design screen and selecting the page from the dropdown.

The screenshot displays the PsychData survey designer interface for 'Example Survey 10250'. The main workspace shows a survey titled 'Survey Title' with a question on 'Page 1': '1. What is your favorite colour?' with radio button options: Blue, Red, Yellow, Item 4, None, and Other (describe). The right sidebar is open to the 'Layout' panel, where a dropdown menu is highlighted with a yellow box, showing 'page1' selected under the heading 'Move the question to page'. Other settings in the sidebar include 'Display the question on a new line', 'Hide the question number', and alignment options for question title, description, and error messages.

However, once your survey goes live, if you reorder the questions of the survey the export will be inaccurate.
