

Export Value Codes

Code “98”

“98” is the value code that appears within the numerical data export when the answer option “Other” is selected.

Code “97”

“97” is the value code that appears within the numerical data export when the answer option “None” is selected.

Code “-999”

“-999” is the value code that appears within the data exports when no answer is selected for a question that is visible to the respondent.

Code “-888”

“-888” is the value code that appears within the data exports when a question is hidden by Page Logic, Question Logic, or if the “Visible” checkbox in the sidebar is not selected, all of which make the question not visible to the respondent.
